Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 7-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Matsushima (4060114).

Matsushima discloses the claimed invention as claimed in claims 1-5, and 7-8 comprising a shank (1), a spindle (5) with a hexagonal shape, a spring wire (6), a groove (13), and bore (16).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsushima (4060114).

- a. Matsushima is discussed above.
- b. Matsushima discloses the claimed invention except for a spring with a width of 2mm. It would have been obvious to one having ordinary skill in the art

Art Unit: 3723

at the time the invention was made to have made a spring with a width of 2 mm, since it has been held that a discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Response to Arguments

5. **Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.**
6. **Applicant needs to cancel 21 and 22 and change the status identifier accordingly.**
7. **Applicant overcame all rejections of the last office action.**
 - c. The art of record still reads on the claims of record. The applicant has amended the claims for the better but the invention is still broad enough that the art even reads on the claims as a 102.
